

# SmartTurn

- never look back!

## The market's most innovative electric truck

ELTOR SmartTurn is an ergonomic and elegant electric truck and tool carrier that can perform a wide range of tasks at cemeteries, housing associations and parks/gardens.

ELTOR SmartTurn is very well suited to narrow and long passages where space is tight. Its reversible driver's platform means that you never have to reverse in narrow passages and always gives the driver the best overview when driving with tools.

The latest technology makes ELTOR SmartTurn an environmentally-friendly and energy-saving machine.

For example, braking energy is re-diverted to the batteries during braking. ELTOR SmartTurn is a real workhorse that can achieve the same traction as a petrol engine with approx. 35 HP. At the same time, it is very operator-friendly and requires no technical knowledge during daily use.

### ELTOR SmartTurn is available in two variants

The 2-wheel drive SmartTurn 2WD and the strong 4-wheel drive SmartTurn 4WD, which are ideal for hilly terrain where a little extra is required. The exterior dimensions and equipment combinations are the same for both versions.

Silent hydraulic articulated steering. Instrument panel with digital info central. Very narrow turning radius. Every safety detail has been checked, No access to moving parts. Electronic parking brake. Highly user-friendly. No maintenance or water filling of batteries. Payloads up to 750 kg. Speed adjustment when cornering. Width: 87 cm Length: 221 cm.

The list of accessories is growing all of the time and we are responsive to new ideas. Feel free to give us a call and we will find a solution that fits your needs.
