

Change-over system

Quick and easy single hand operation!

CATMAN is articulated and can drive on narrow roads (80 cm). CATMAN is very easy to drive thanks to its stepless hydrostatic propulsion and power steering. CATMAN has a built-in differential lock for driving in rough terrain and requires minimal maintenance.

For Platforms, Leaf collectors, Leaf containers

With some extra equipment the change-over system can be used with any CATMAN truck with hydraulic lift and turnable platform.

The stay rod is mounted in front of the platform, the platform is raised with the hydraulic.

The stay legs are turned to vertical position and locked... - and CATMAN is ready to fetch another platform, leaf collector etc.

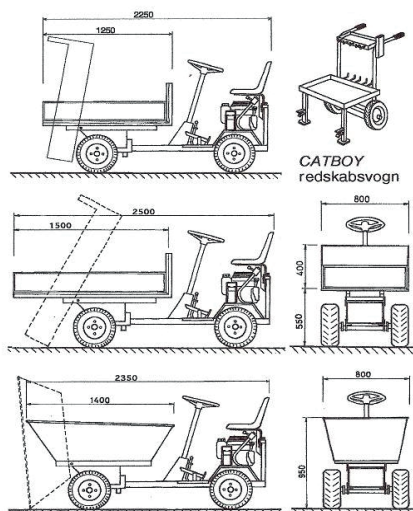

While driving, the suction nozzle can be raised or lowered - quick and handy changing for use with suction hose
